MTB DEMOLITION ATTACHMENTS

MTB Demolition Attachments are used for primary and secondary concrete demolition. There is a wide range of MTB Attachments for different demolition applications.

DEMOLITION CRUSHER - DCR

Their jaw design is a combination of concrete cutters and concrete crusher jaws. The upper jaw can cut concrete and the lower jaw can crush concrete. The blades on the deeper part of the jaws can easily cut iron. They are suitable for the primary and secondary demolition operations of concrete structures. Demolition crushers also have a 360° rotation system that lets the user to operate at all angles and positions.

DCR 15

| | | |
|--------------------------|-----|-------------|
| Working weight | kg | 1660 - 1900 |
| Oil flow (Cylinder) | lpm | 200 - 250 |
| Pressure (Cylinder) | bar | 350 |
| Oil flow (Rotation) | lpm | 20 - 40 |
| Pressure (Rotation) | bar | 150 - 160 |
| Crushing force (Jaw tip) | t | 65 |
| Cutting force | t | 242 |
| Jaw opening | mm | 730 |
| Jaw depth | mm | 760 |
| Cutter length | mm | 180 |
| Overall length | mm | 2050 |
| Carrier weight | t | 20 - 25 |
