DEMOLITION CRUSHER MODEL

DCR 20

MTB DEMOLITION ATTACHMENTS

MTB Demolition Attachments are used for primary and secondary concrete demolition. There is a wide range of MTB Attachments for different demolition applications.

DEMOLITION CRUSHER - DCR

Their jaw design is a combination of concrete cutters and concrete crusher jaws. The upper jaw can cut concrete and the lower jaw can crush concrete. The blades on the deeper part of the jaws can easily cut iron. They are suitable for the primary and secondary demolition operations of concrete structures. Demolition crushers also have a 360° rotation system that lets the user to operate at all angles and positions.

DCR 20

Working weight	kg	2400 - 2800
Oil flow (Cylinder)	lpm	200 - 250
Pressure (Cylinder)	bar	350
Oil flow (Rotation)	lpm	25 - 50
Pressure (Rotation)	bar	150 - 160
Crushing force (Jaw tip)	t	85
Cutting force	t	315
Jaw opening	mm	955
Jaw depth	mm	920
Cutter length	mm	2 x 180
Overall length	mm	2250
Carrier weight	t	28 - 50
